The 48MP Main camera is more advanced than ever, capturing super-high-resolution photos with a new level of detail and colour.

You'll see the improvements in your portraits. And now you no longer have to switch to Portrait mode. If your subject is a person, dog or cat, iPhone automatically captures depth information. So you can choose to instantly **see your photo as a portrait**, with an artful blur effect. Or later in the Photos app.

It's easy to switch from Android to iPhone.

How easy? Hear it from the people who switched to iPhone, and explore everything from amazing camera features and long-lasting battery life, to durability and privacy. And it's easy to get all your contacts, photos, videos and even WhatsApp content transferred with Move to iOS app.

"Using the Move to iOS app, I transferred all my data to iPhone."

Isha K.

"I used to game with glitches. Now my experience is seamless."

Chirag B.

"I keep my game data on my iPhone."
